

Task Description

Your goal will be to build flight front page where you can Select **From** and **To**. And then show available flights with prices. Where on the price list page you must display the weather of the Destination (based on the flight date provided). We can also sort it by Price departure/arrival time

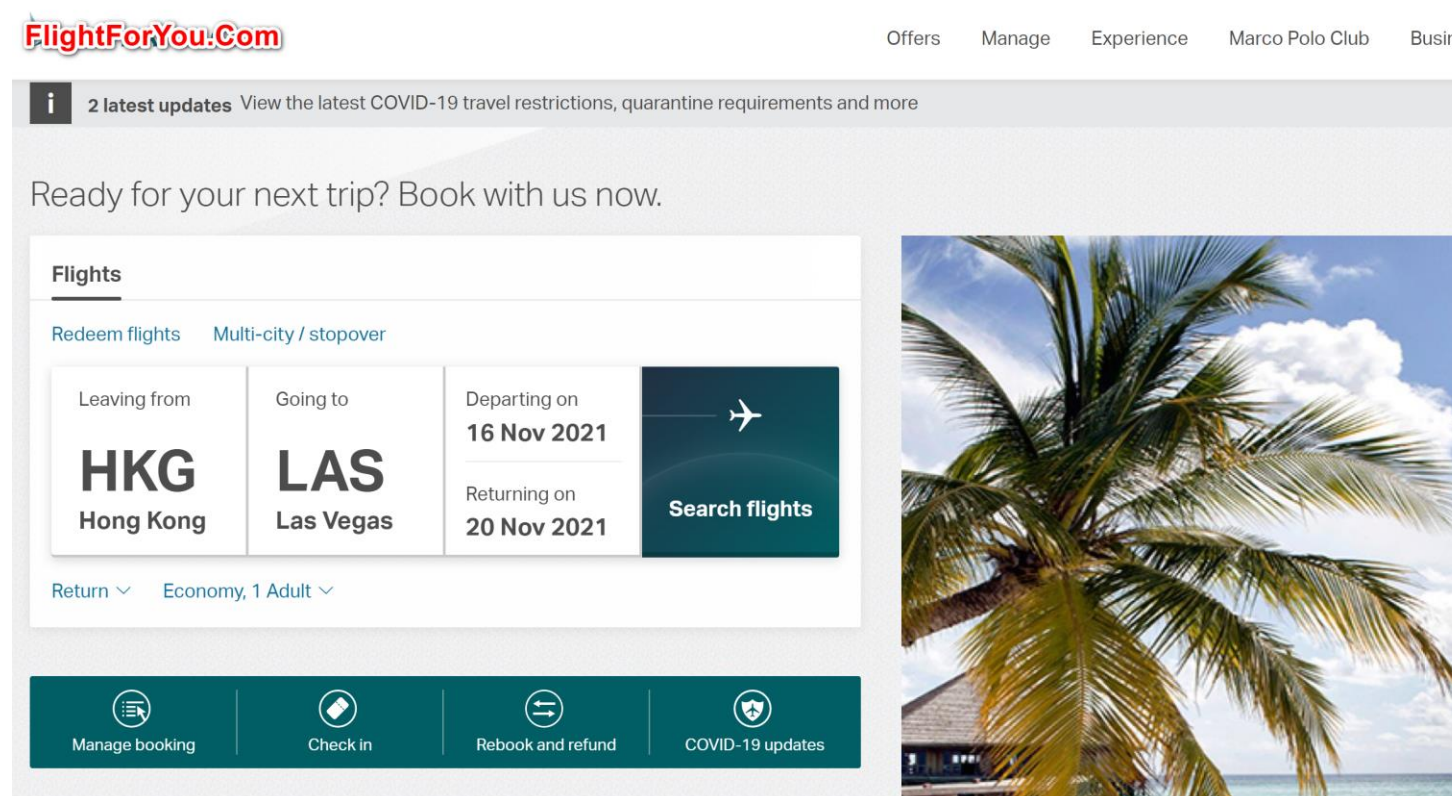

More details for this task,

Here are API lists,

For flight <https://api.sharetrip.net/api/v1/flight/search/airport?name=Vancouver>

For Weather [Weather API Documentation \(weatherbit\) | RapidAPI](#), [Open Weather Map API Documentation \(community\) | RapidAPI](#), [WeatherAPI.com API Documentation \(weatherapi\) | RapidAPI](#), [Forecast API Documentation \(wettercom-wettercom-default\) | RapidAPI](#)

Acceptance criteria

- Below technology/tools must be used
 - [HTML5](#)
 - [CSS](#)
 - [Javascript](#)
 - [VueJS](#)
- Must send a Github repo link which is public and contains a README.md, by following the file I can be able to run your project
- Can use NodeJS and ExpressJS if its help
- No cheating, will be disqualified

Note:

The above design only for illustration purpose, I want everyone to come up with your own design, which will be unique based on the experience you gathered on components over the past week. And the easier, attractive and useable version will get extra score.
